

REALTIME GLOSSARY

A realtime glossary enables the court reporter to create a job dictionary with specific terminology and proper names that may be unique to a case. It reduces the amount of untranslated steno that will appear in realtime transcript.

For all cases to be heard before District Judge Michael J. Juneau, the following things need to be included in the realtime glossary and provided to the Courtroom Deputy for Judge Juneau, for transmittal to the court reporter at least ten (10) business days before the trial is scheduled to begin.

- **SHORT INTRODUCTION** outlining what the case is about and when the trial date is. An example would be: Offshore rig accident out in the Gulf of Mexico resulting in a back injury. The trial date is September 10, 2010.
- **LIST OF ALL PROPER NAMES** This needs to include short forms of ALL names AND/OR any nicknames that may be used during the trial. For instance, James Keith smith a/k/a Jim Smith a/ka/ Jimmy Smith. For company names, list the full legal name as well as any short form names that will come up during the trial. An example of this would be Bluebonnet Insurance Company, Incorporated a/k/a Bluebonnet a/k/a BICI. If the name is not gender apparent, please include Mr. or Ms.
- **WILL CALL and MAY CALL WITNESS LISTS**
- **EXHIBIT LISTS**
- **ALL EXPERT REPORTS AND CURRICULUM VITAE**
- **KEY WORD INDEXES FROM ALL DEPOSITIONS TAKEN IN THE CASE.**
- **IMPORTANT DATES.** This would include things like the accident date, surgery dates, et cetera.
- **TECHNICAL/MEDICAL TERMS**
